Android development

Java Backend Developer

Full stack developer with experience in web and mobile applications development following the Agile methodology. I am more attracted to the backend than the frontend, and I have had the opportunity to participate in every level of the development, from conception to deployment. Java is my comfort zone, and I value the clarity, legibility and maintainability of the code.

Professional experience

July 2017

Full-stack developer at Praxedo

Paris and Madrid

Conception, development and maintenance of a multi-platform Field Service Management application in an Agile team of 5-7 developers.

Technical support and bug fix (N3 and N4).

Role of tech lead in the team.
