Java Backend Developer

Full stack developer with experience in web and mobile applications development following the Agile methodology. I am more attracted to the backend than the frontend, and I have had the opportunity to participate in every level of the development, from conception to deployment. Experienced in Java, I value the clarity, legibility and maintainability of the code.

Professional experience

July 2017 | **Full-stack developer at Praxedo** *Paris and Madrid*

Conception, development and maintenance of a multi-platform Field Service Management application in an Agile team of 5-7 developers.
Technical support and bug fix (N3 and N4).
Role of tech lead in the team since February 2019.

`Java EE` `Javascript` `JUnit` `Struts` `Hibernate` `SQL` `Spring` `JAX-WS` `YUI` `Tomcat` `Jenkins` `Scrum` `TDD` `Ansible` `JMockit` `Mockito` `Nexus`

Jan-Jul 2017 | **Internship at Praxedo** *Paris*

Development of a routing engine in Java.
Manipulation and integration of geolocation big data.

`Java` `Spring Boot` `REST API` `Maven` `Hadoop`

Summer 2016 | **Intern researcher at Walailak University** *Thailand*

Development of Virtual Reality applications related to the manufacturing industry using Unity 3D and C#.

`C#` `Unity3D` `Android`

Education

2016-2017 | **Industrial Engineering at Ryerson University** *Toronto*

Last semester of the Industrial Engineering degree.
Introductory course to Big Data analysis and the Hadoop framework.

2014-2017 | **Industrial Engineering at Grenoble INP** *Grenoble*

Specialization in Product Engineering
