Fullstack Developer

Full stack developer with experience in web and mobile applications development following the Agile methodology. I am more attracted to the backend than the frontend, and I have had the opportunity to participate in every level of the development, from conception to deployment. Experienced in Java, I value the clarity, legibility and maintainability of the codebase.

Professional experience

April 2020 · **Full-stack developer at Bluetab** · *Madrid*

- Development from scratch of a management web application for CEAR, for them to manage their projects, funds, grants, etc.
- Development and support of the Naturgy asset management system (eSIR). The eSIR system catalogs and manages a huge part of the Naturgy electrical assets.
